Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election of the invention of Group II (claims 19-23 and new claims 24-31) in the reply filed on October 31, 2006 is acknowledged.

Accordingly, this action addresses pending claims 19-31.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-21, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Medoff et al. (US 7,044,951) in view of Orlich (US 3,561,437).

Medoff et al. disclose a method of fixing a fracture including the steps of: drilling a K-wire through a portion of bone; reducing the fracture; positioning a bone plate over the K-wire; and securing a second portion of the plate on a side opposite the osteotomy (col. 3, lines 38-67 and col. 4, lines 1-37).

Medoff et al. disclose all steps of the claimed invention except for performing an osteotomy.

Orlich teaches using osteotomy to position a plate to promote healing by accelerating osteogenesis because more raw bone surface is in contact at the fracture site (col. 4, lines 8-18).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have utilized osteotomy, as taught by Orlich, to position the Medoff et al. plate in order to accelerate osteogenesis.

Art Unit: 3733

Allowable Subject Matter

Claims 22-23 and 26-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
